SUMMARY

Software and AI/ML enthusiast with hands-on experience in software development, AI/ML, and data-driven applications, focused on solving real-world problems through technology. Experienced in building solutions from the ground up, leading teams, and translating ideas into practice, with industry experience at ONGC and Grid Apps LLC.

SKILLS AND INTERESTS

Languages and Data: Python, SQL, C++, C, NumPy, Pandas, PySpark
AI / ML: Machine Learning, Deep Learning, NLP, LLMs, RAG, Computer Vision, XAI
Backend and Systems: FastAPI, Flask, React.js, Git, Linux
Fundamentals: DSA, OOP, DBMS, Operating Systems, Computer Networks, Software Engineering

EDUCATION

Manipal University Jaipur | Jaipur, India 2023-2027
Bachelor's in Computer and Communication Engineering **CGPA:-** 7.97/10.00

Mata Kasturi Devi Sr. Sec. Public School | New Delhi, India 2022-2023
Upper Secondary Education **Percentage:-** 75.6%

The Tonsbridge School | Dehradun, India 2020-2021
Lower Secondary School **Percentage:-** 91.8%

WORK EXPERIENCE

Software Development Intern,Grid Apps LLC |New York,United States Website | June 2026 - Present

- Developed and enhanced Next.js frontend modules for a multi-tenant CMS, integrating Laravel REST APIs for dynamic data management and CRUD operations. Improved internationalization and multilingual functionality through reusable components and optimized localized content rendering. Redesigned and optimized the administrative dashboard, enhancing responsive UI/UX, navigation, API integrations, data presentation, and overall application performance.

SAP ABAP Intern,ONGC Ltd |New Delhi,India June 2025 - July 2025

- Developed SAP ABAP solutions for vendor, tender, EMD, and refund management as part of ONGC's Project ICE, automating key procurement workflows and data processes. Built module-pool Dynpro applications, implemented Open SQL-based data handling, and developed ALV and Adobe PDF reports for efficient information management. Enhanced business process automation through structured database operations, validations, and role-based functionality within the SAP environment.

PROJECTS & DISTINCTIONS

1.PPE Detection Kit
Tech Stack: Python, YOLO, OpenCV, PyTorch, NumPy, and Computer Vision.
Developed a real-time computer vision system to detect whether workers are wearing required Personal Protective Equipment (PPE). Used YOLO and OpenCV to identify safety gear such as helmets, safety vests, and other protective equipment from live video feeds.The system automatically detects PPE violations and helps improve workplace safety through faster monitoring and alerts.

2. Paw Patrol
Tech Stack: HTML, CSS, JavaScript, PHP, MySQL and REST APIs. WEBSITE
Developed a full-stack pet care platform connecting pet owners, adopters, and caregivers through a unified web application. Enabled dog adoption, fostering, buying/selling, and pet-related services, along with an integrated pet supplies marketplace. Implemented secure authentication, role-based access control, and structured database management for efficient data handling.

Achievements & Recognition

- **1X Hackathon Runner-Up:** Secured 2nd position and a ₹30,000 cash prize by developing AlertLens, a solution designed to analyze, prioritize, and streamline incident detection and response.AlertLens is a smart system that groups and analyzes alerts, identifies important issues.
- **Student Excellence Awardee (2X)-** Awarded by the college for outstanding research contributions, innovative project development, and consistent academic excellence.

EXTRA CURRICULAR

- **Business Development and Internal Relations Manager** at **IAESTE INDIA LC MUJ** - Managed Incoming and Outgoing Exchange, facilitating international internship opportunities. Led corporate outreach and internal coordination to strengthen student opportunities.
- **Student Placement Coordinator (SPC) | Manipal University Jaipur** - Coordinated placement activities between students and recruiters. Supported recruitment processes involving 20+ companies
